Injection Molded, Recycle PP, Perforated Double Deck, full perimeter 6-Runner, 4-way entry, non-reversible, one-way application pallet. Load Bearing Capacity : Static Load : on ground floor UDL 2000 kg. for light weight products; Dynamic Load UDL 1000 kg; for light weight products. Racking – not applicable. MHE & HPT : Wider HPT with width over fork of 685mm recommended for floor use. Forklift Width over Fork Distance should be ideally 700mm.

Standard Features :

- Stackable Pallet in Sea Freight containers & floor use for light weight products.
- Stretch Wrap ribs – add tamper evidence to stretch wrap. You can't remove & re-fit stretch wrap, Ribs would tear it while removing.
- Safety Belt hook – Use Strapping belt to make NON-UDL load as UDL load, enhance safety of your product. Enhance Stacking stability during prolonged storage & multiple handling.
- PP Strapping Slot – We recommend low cost PP strapping for small cartons crates, small PET//Glass bottles. Separators & top cap available on request. The in-built provision of PP strapping slot enables multiple handling of these light weight manifold numbers. Small objects do not fall-off the pallet during handling or with little jerk or light hit.
- Top Deck perforation designed anti-slip for products & pallet do not slip off from forks due to special design anti-skid grommets.

PALLET USAGE General Rules

ORPAT Pallet have been tested to international standards. It must be handled by proper methods to avoid undesirable consequences. Please use the pallet within the stipulated General Rules stated below:

Pallet are designed only for the handling, storage and distribution of well packed goods. Please use accordingly

Never exceed the maximum load specifications of the pallets.

Pallet are made from thermo-plastic resin. Never place them close to fire, heater, strong acids or solvent.

Pallet become more brittle and slippery in cold room condition. Please use with care.

Most pallet are equipped with anti-slip rubber. However, please pay special attention when handling in wet or oily conditions as the pallet may be slippery.

Do not modify the shape of the pallet to prevent the reduction of strength.

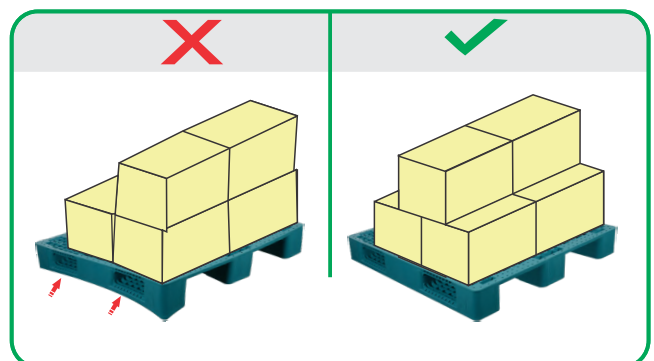

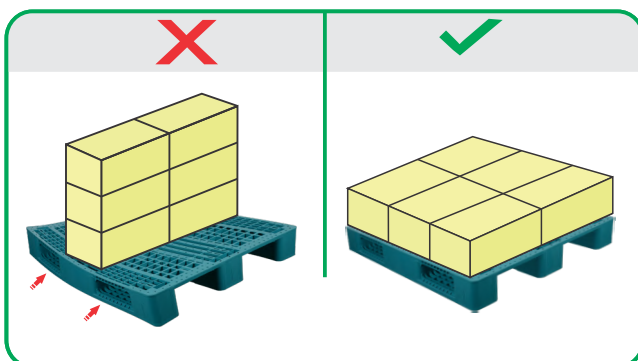

Do not push loaded pallet on the floor, road or lorry; always lift it up before moving.

Do not hit pallet edges using forklift forks even though pallet is empty.

Do not throw or drop pallet

Fork must be fully inserted into Pallet before lifting it.

Always distribute goods evenly in cross-stacked manner over the pallet surface
